

SHUSTHO — Menstruation Health Tracker

Website Build Prompt (Next.js + React)

For AI Code Generators / Development Teams

PROJECT OVERVIEW

Build a complete responsive website for “Shustho” — a menstruation and reproductive health tracker web platform for Bangladesh. The website serves as BOTH a marketing landing page AND a functional Progressive Web App (PWA) that mirrors the mobile app experience. Must be 100% free, offline-capable where possible, and support Bangla (বাংলা) + English.

DESIGN SYSTEM (MUST MATCH MOBILE APP EXACTLY)

Color Palette

Token	Hex	Usage
Primary	#E94560	CTAs, period indicators, primary buttons, active nav items, hero accents
Primary Light	#FF6B8A	Hover states
Primary Dark	#C73E54	Active/pressed states
Secondary	#58A6FF	Prediction badges, informational cards, links, ovulation indicators
Secondary Light	#7AB8FF	Hover
Success	#238636	Healthy status, confirmations, guardian active, checkmarks
Success Light	#2EA043	Hover
Warning	#D29922	Medium alerts, mood indicators, pending states
Warning Light	#E3B341	Hover
Danger	#DA3633	Critical alerts, severe pain, red flags, error states
Danger Light	#F85149	Hover
Background Dark	#0D1117	Dark mode page background
Background Dark Elevated	#161B22	Cards, panels
Background Dark Muted	#21262D	Inputs, secondary surfaces
Background Light	#FFFFFF	Light mode page background
Background Light Elevated	#F6F8FA	Cards
Background Light Muted	#F3F4F6	Inputs
Text Primary Dark	#C9D1D9	Main text dark mode
Text Secondary Dark	#8B949E	Secondary text dark mode
Text Tertiary Dark	#6E7681	Muted text dark mode
Text Primary Light	#1F2328	Main text light mode
Text Secondary Light	#656D76	Secondary text light mode
Text Tertiary Light	#8C959F	Muted text light mode

Table 1 – continued

Token	Hex	Usage
Border Dark	#30363D	Dividers, borders dark mode
Border Light	#D0D7DE	Dividers, borders light mode

Typography

- Font family: Inter (Google Fonts), system-ui, sans-serif
- Weights: 400 (regular), 500 (medium) ONLY
- Scale:
 - Display: 32-40px, weight 500, line-height 1.1
 - H1: 28px, weight 500, line-height 1.2
 - H2: 22px, weight 500, line-height 1.3
 - H3: 18px, weight 500, line-height 1.4
 - Body: 16px, weight 400, line-height 1.5
 - Small: 14px, weight 400, line-height 1.5
 - Caption: 12px, weight 400, line-height 1.4
 - Button: 14px, weight 500, line-height 1

Spacing Scale

4px, 8px, 12px, 16px, 20px, 24px, 32px, 48px, 64px

Border Radius Scale

- 6px: Chips, tags, badges
- 8px: Buttons, inputs, icon buttons
- 10px: Cards, list items
- 12px: Elevated panels, modals, dropdowns
- 16px: Large modals, hero cards
- 9999px: Pills, avatars, status badges

Shadows

FLAT DESIGN — No box shadows. Use borders for elevation and separation.

Icons

- Style: Outlined (NOT filled)
- Stroke width: 1.8px
- Sizes: 20px (inline), 24px (buttons/navigation), 48px (feature illustrations)
- Color: Inherits from text color or specific token
- Library: Lucide React (preferred) or Heroicons

Animation

- Duration fast: 100ms
- Duration normal: 200ms
- Duration slow: 300ms

- Easing: cubic-bezier(0.16, 1, 0.3, 1) for entrances, cubic-bezier(0.4, 0, 0.2, 1) for standard
- Page transitions: fade 200ms
- Card hover: translateY(-2px) + border-color change, 150ms
- Button hover: brightness increase, 100ms
- Chart load: draw animation 800ms
- Modal: scale from 0.95 + fade, 200ms
- Skeleton loading: pulse animation
- Toast notifications: slide in from top-right, auto-dismiss 4s

LANDING PAGE SECTIONS (11 Sections)

1. HERO SECTION

- Full-width dark background (#0D1117)
- Headline: “Track Your Cycle. Own Your Health.”
- Bangla headline: “ ”
- Subheadline: “Shustho is a free, offline-first period and reproductive health tracker built for Bangladesh. Your data stays on your device — private, secure, and yours alone.”
- Two CTAs side by side:
 - Primary: “Download App” (pink fill, white text)
 - Secondary: “Use Web Version” (transparent, pink border)
- Hero visual: Abstract cycle visualization with soft gradient shapes (pink #E94560 to blue #58A6FF) — NO stock photos of people
- Scroll indicator at bottom (animated chevron)
- Responsive: Stack CTAs vertically on mobile

2. FEATURES GRID

- Section title: “Everything You Need”
- Bangla: “ ”
- 3-column grid on desktop, 2 on tablet, 1 on mobile
- 9 feature cards:

#	Feature	Icon	Description
1	Period Tracking	Calendar	Log your period with one tap. Track cycle length, duration, and regularity.
2	Flow Measurement	Droplets	Record flow intensity from light to heavy. Track products used and symptoms.
3	AI Predictions	BrainCircuit	Smart predictions for your next period. Adapts to irregular cycles and PCOS.
4	Nutrition Hub	Apple	Phase-based meal suggestions. Iron-rich foods, PCOS-friendly recipes, water tracking.
5	Pain Tracker	Activity	Log pain levels 1-10, location, and relief methods. Identify patterns over time.

Table 2 – continued

#	Feature	Icon	Description
6	Mood & Mind	Smile	Track daily mood, energy, and sleep. Understand emotional patterns with your cycle.
7	Health Alerts	AlertTriangle	Red flag detection for serious symptoms. Guidance on when to see a doctor.
8	Guardian Care	Users	Share selected health updates with trusted family. Full privacy control.
9	PCOS Support	Microscope	Dedicated tracking for PCOS, Endometriosis, PMDD, and more conditions.

- Each card: 48px outlined icon (colored), title (18px medium), 2-line description (14px secondary), pink left border on hover
- Card background: #161B22 (dark), #F6F8FA (light)
- Border: 1px solid border color
- Border-radius: 10px
- Padding: 24px
- Hover: border-color changes to primary, translateY(-2px)

3. HOW IT WORKS

- Section title: “How Shustho Works”
- Bangla: “ ”
- 4-step horizontal timeline (vertical on mobile)
- Steps connected by lines (pink, 2px)

Step	Number	Title	Description
1	Circle with “1”	Log Your Period	Tap to record your period start and end dates. Add flow intensity and symptoms.
2	Circle with “2”	Track Daily	Log pain, mood, nutrition, and any health changes each day.
3	Circle with “3”	Get Insights	View trends, predictions, and personalized health tips based on your data.
4	Circle with “4”	Share & Care	Optionally share updates with a guardian. Export reports for your doctor.

- Step circles: 48px, primary fill, white text
- Connector lines: 2px solid primary
- Active step: larger circle (56px), glow effect

4. LIVE DASHBOARD PREVIEW (Interactive Demo)

- Section title: “Your Health Dashboard”
- Bangla: “
”
- This is a FUNCTIONAL preview, not just an image
- Dark card (#161B22) containing:
 - Cycle status card (large, pink border): “Day 3 of Period”, “Medium Flow”, “Mild Cramps”
 - Next prediction (blue border): “Next Period: Aug 28”, “85% confidence”
 - Mini calendar widget (current month, period days highlighted in pink, predicted in dashed blue)
 - Pain chart: bar chart showing last 7 days pain levels
 - Mood trend: line chart showing mood over last 14 days
- All charts use Recharts with design system colors
- “Try the Full App” CTA below
- MUST look identical to mobile app dashboard

5. PCOS & CONDITIONS

- Section title: “Beyond Period Tracking”
- Bangla: “
”
- Tabbed interface (horizontal scroll on mobile)
- Tabs: PCOS, Endometriosis, PMDD, Fibroids, Thyroid
- Each tab shows:
 - Brief condition explanation (2-3 sentences)
 - Tracking features available in app (bullet list)
 - Sample data visualization (chart showing mock data)
 - “Learn More” link (scrolls to FAQ)
- Use green accent (#238636) for this section to differentiate
- Cards with 10px radius, subtle border

6. GUARDIAN FEATURE

- Section title: “Care Circle”
- Bangla: “
”
- Split layout: 50/50 on desktop, stacked on mobile
- LEFT SIDE:
 - Explanation text about guardian feature
 - Privacy controls illustration (toggle switches)
 - “Your data, your control” emphasis
- RIGHT SIDE:
 - Mock guardian dashboard (simplified view)
 - Shows what guardian sees: “Period started today”, “Pain: High (8/10)”, “Mood: Needs Support”
 - Guardian reply: “Take rest, I’m here”
 - Styled as a chat-like interface
- Use blue accent (#58A6FF) for guardian elements

7. TESTIMONIALS

- Section title: “What Users Say”
- Bangla: “ ”
- 3 testimonial cards in a row (1 on mobile)
- Each card:
 - Quote text (italic, 16px)
 - Star rating (5 stars, filled yellow)
 - Name, age, location
 - Small avatar (40px circle, initials if no photo)
- Card style: elevated background, 10px radius, pink left border (3px)
- Mock testimonials (realistic for Bangladesh context):
 - “Shustho helped me identify my PCOS symptoms early. The doctor report feature saved me so much time.” — Fatima, 24, Dhaka
 - “My husband gets alerts when my pain is severe. He knows when to help without me asking.” — Ayesha, 28, Chittagong
 - “Finally a period tracker that works offline. I don’t worry about my data being sold.” — Nusrat, 19, Sylhet

8. DOCTOR NETWORK

- Section title: “Find a Doctor”
- Bangla: “ ”
- Interactive map of Bangladesh (simplified SVG)
- City markers: Dhaka, Chittagong, Sylhet, Rajshahi, Khulna, Barisal, Rangpur
- Click marker → show hospital list for that city
- List view below map (default view on mobile):
 - Hospital cards: name, address, phone, specialties, “Call Now” button
 - Filter by: City, Specialty (Gynecology, Endocrinology, Fertility)
 - Search bar
- Hospital cards: 10px radius, border, hover effect
- “Book Appointment” button links to phone call

9. PRICING

- Section title: “Completely Free. Forever.”
- Bangla: “ ”
- SINGLE card (no tiers — everything is free)
- Large checkmark icon (green, 64px)
- “\$0 / forever” price display
- Feature list with green checkmarks:
 - Unlimited period tracking
 - AI-powered predictions
 - Offline mode
 - Pain & mood tracking
 - Nutrition hub
 - Guardian access
 - PCOS & condition tracking
 - Doctor report export

- All languages
- No ads, ever
- “Download Now” CTA (pink, large)
- “No credit card required” subtext

10. FAQ

- Section title: “Frequently Asked Questions”
- Bangla: “ ”
- Accordion component (8 items)
- Each item: question (16px medium) + expandable answer (14px secondary)
- Chevron icon rotates on expand
- Questions:
 1. Is my data really private?
 2. Can I use Shustho without internet?
 3. How accurate are the period predictions?
 4. Can I track PCOS symptoms?
 5. How does the guardian feature work?
 6. Is Bangla language fully supported?
 7. Can I export data for my doctor?
 8. Will there be ads or paid features?

11. FOOTER

- Dark background (#0D1117)
- 4-column layout on desktop, stacked on mobile
- Column 1: Logo + tagline + app store badges
- Column 2: Quick Links (Features, How It Works, Doctor Network, FAQ)
- Column 3: Legal (Privacy Policy, Terms of Service, Data Policy)
- Column 4: Connect (Email, WhatsApp Community, Facebook)
- Bottom bar: Copyright + Language toggle (/ English)
- Social icons: 24px outlined

WEB APP (PWA) FUNCTIONAL SCREENS

The web app is a fully functional Progressive Web App. These screens MUST match the mobile app layout 1:1.

1. AUTH / ONBOARDING

- Welcome screen with animated logo
- Language selection: / English (large toggle buttons)
- Basic info form: name, birth date, average cycle length
- Health conditions checklist: PCOS, Endometriosis, PMDD, Fibroids, Thyroid, None
- Optional guardian phone setup
- Skip option at every step
- Progress indicator (dots)

2. DASHBOARD (/dashboard)

- Top bar: greeting (“Good morning, [Name]”), settings icon, notification bell with badge
- Cycle status card (large, pink border):
 - “Day X of Period”
 - Flow level indicator
 - Pain level indicator
 - “End Period” button (if active)
- Quick action buttons row (4 equal buttons):
 - Log Flow (pink icon)
 - Log Pain (pink icon)
 - Log Mood (pink icon)
 - Log Nutrition (pink icon)
- Prediction card (blue border):
 - “Next Period: [Date]”
 - Confidence percentage
 - Countdown (“in 12 days”)
- Recent alerts banner (if any):
 - Red for critical, amber for warning
 - Dismissible
- Mini calendar widget:
 - Current month
 - Period days: pink background
 - Predicted days: dashed blue border
 - Clickable days
- Today’s summary:
 - Mood icon + label
 - Water intake: X/8 glasses
 - Pain: X/10
 - Nutrition: meals logged

3. CALENDAR (/calendar)

- Full month calendar (custom styled react-calendar)
- Period days: solid pink circle background, white text
- Predicted days: dashed blue circle border, blue text
- Ovulation day: green dot below date number
- Today: ring border in primary color
- Click day → right side panel opens (desktop) or bottom sheet (mobile) with:
 - Date header
 - Flow log (if any)
 - Pain log (if any)
 - Mood log (if any)
 - Nutrition log (if any)
 - Notes
- Month navigation arrows
- “Log Today” floating button

4. LOG ENTRY (/log)

- Tabbed interface: Period | Flow | Pain | Mood | Nutrition
- Period tab:
 - Date pickers for start/end
 - Cycle notes textarea
- Flow tab:
 - 4-level intensity selector (visual drop icons, large touch targets)
 - Product used dropdown: Pad, Tampon, Menstrual Cup, Period Underwear, None
 - Clots toggle + size selector
- Pain tab:
 - 1-10 slider with real-time color gradient (green→amber→red)
 - Pain level label updates (“Mild”, “Moderate”, “Severe”)
 - Location checkboxes (grid layout)
 - Relief methods multi-select
 - Duration input (hours/minutes)
 - Medication name + dose
- Mood tab:
 - Mood selector grid: 8 emotions with icons (3 columns)
 - Selected mood gets primary color highlight
 - Energy level slider: 1-5
 - Sleep quality slider: 1-5
 - Sleep duration input
 - Notes textarea
- Nutrition tab:
 - Meal type tabs: Breakfast, Lunch, Dinner, Snack
 - Food search with autocomplete (local DB)
 - Iron-rich toggle
 - Anti-inflammatory toggle
 - Water intake: + / - buttons with glass counter
- Save button: full width, pink, fixed at bottom on mobile

5. INSIGHTS (/insights)

- Date range selector: 1m, 3m, 6m, 1y buttons
- Cycle length trend: line chart (Recharts)
 - X-axis: cycle number
 - Y-axis: days
 - Average line (dashed)
- Pain level chart: bar chart by cycle day
 - X-axis: cycle day 1-7
 - Y-axis: pain level
 - Color coded bars
- Mood distribution: pie/donut chart
 - Segments: 8 mood types
 - Legend below
- Nutrition summary:
 - Iron intake trend line

- Water intake average
- Meal type distribution
- PCOS metrics (if enabled):
 - Weight trend line
 - Acne severity timeline
 - Symptom occurrence heatmap
- Export button: PDF / CSV toggle, then download

6. HEALTH (/health)

- My Conditions list:
 - Cards for each tracked condition
 - Edit/delete actions
 - Add new condition button
- Red Flag Alerts history:
 - List of past alerts
 - Filter by severity
 - “Export History” button
- Health tips carousel:
 - Auto-rotate every 5 seconds
 - Manual navigation dots
 - Tips in Bangla and English
- Doctor report generator:
 - Date range picker
 - Preview modal with formatted report
 - Download PDF / CSV buttons
- Find Doctor:
 - Search by city/specialty
 - List view with hospital cards
 - Map toggle
 - “Call Now” button

7. GUARDIAN (/guardian)

- Guardian list:
 - Cards showing: name, relationship, phone, status (active/pending)
 - Remove button (hover-revealed)
- Add guardian button:
 - Modal with phone input (+880 format)
 - Relationship dropdown
 - Permissions checklist:
 - * Share cycle status
 - * Share pain alerts (>7/10)
 - * Share mood summary
 - * Share detailed symptoms
 - * Share nutrition data
- Guardian view preview:
 - “This is what [Name] sees”

- Simplified dashboard mockup
- Activity log:
 - Timeline of what was shared when
 - Filter by guardian

8. SETTINGS (/settings)

- Profile section:
 - Avatar (initials or upload)
 - Name input
 - Birth date picker
 - Cycle average length
- Language toggle:
 - | English (segmented control)
 - Immediate switch, no reload
- Notification preferences:
 - Toggle list for each reminder type
 - Quiet hours time picker
- Privacy:
 - Local-only mode toggle (disables cloud)
 - Data encryption status indicator
 - App disguise option (rename to “Health Tracker”)
 - PIN/biometric lock toggle
- Data management:
 - Export all data (JSON/CSV)
 - Import data (file picker)
 - Clear all data (confirm dialog)
- About:
 - App version
 - Open source credits
 - Contact email
 - Rate app button

TECH STACK

Layer	Technology	Purpose
Framework	Next.js 14+ (App Router)	SSR, SSG, PWA support
Language	TypeScript 5+	Type safety
Styling	Tailwind CSS v3	Utility-first CSS
UI Components	shadcn/ui	Accessible, customizable components
State Management	Zustand	Lightweight, offline-friendly
Local Storage	IndexedDB (via idb-keyval)	Structured health data
Settings Storage	localStorage	User preferences
Charts	Recharts	Responsive data visualization
Calendar	react-calendar	Custom styled month view

Table 4 – continued

Layer	Technology	Purpose
PDF Generation	jsPDF + html2canvas	Doctor report export
PWA	next-pwa	Service worker, offline caching, manifest
Icons	Lucide React	Outlined icon library
Fonts	Inter (Google Fonts)	Primary typeface
i18n	next-intl	Bangla + English localization
Date/Time	date-fns	Formatting, manipulation
Forms	React Hook Form + Zod	Validation
Animations	Framer Motion	Page transitions, micro-interactions

OFFLINE CAPABILITY (PWA)

- Service worker caches all static assets (JS, CSS, fonts, icons)
- IndexedDB stores all user health data locally
- Background sync queue for guardian notifications (when connection returns)
- Offline indicator banner when connection lost (top of page, amber)
- All core features work without internet:
 - Period logging
 - Symptom tracking
 - Charts and insights
 - Report generation
 - Settings

- Online-only features (graceful degradation):
 - Guardian SMS notifications
 - Doctor directory updates
 - Cloud backup (if enabled)

RESPONSIVE BREAKPOINTS

Breakpoint	Width	Layout
Mobile	< 640px	Single column, bottom nav bar (5 icons), full-screen sheets
Tablet	640-1024px	2-column layout, side nav (collapsible)
Desktop	1024-1280px	3-column dashboard, persistent side nav, expanded charts
Wide	> 1280px	Max-width 1200px centered, spacious layout

- Touch targets: minimum 44x44px on all devices
- Font scaling: respects browser zoom (no fixed px below 12px)
- Images: responsive srcset for performance

SEO & PERFORMANCE

SEO

- Meta title: “Shustho — Free Period & Health Tracker for Bangladesh”
- Meta description: “Track your menstrual cycle, manage PCOS symptoms, and share health updates with trusted guardians. 100% free, offline-first, and private.”
- Open Graph image: 1200x630px, dark background, app screenshot
- Twitter Card: summary_large_image
- Structured data: HealthApplication schema
- Sitemap.xml auto-generated
- robots.txt: allow all

Performance Targets

- Lighthouse Score: 90+ in all categories
- Core Web Vitals:
 - LCP (Largest Contentful Paint): < 2.5s
 - FID (First Input Delay): < 100ms
 - CLS (Cumulative Layout Shift): < 0.1
- Bundle size: < 200KB initial JS
- Image optimization: WebP format, lazy loading
- Font loading: font-display: swap

- Bangla font subsetting for fast load

BANGLADESH LOCALIZATION

Language Implementation

- Primary: Bangla (বাংলা) — default for Bangladesh IP
- Secondary: English
- URL structure: /bn/dashboard or /en/dashboard
- next-intl middleware handles locale routing
- All UI text, alerts, health tips, reports in both languages
- Date format: DD/MM/YYYY
- Time format: 12-hour (AM/PM) or 24-hour based on preference

Cultural Adaptations

- Phone format: +880 1XXX-XXXXXX with validation
- Currency: BDT (টাকা) — for any future features
- Religious sensitivity:
 - No automatic fasting advice during Ramadan
 - Option to pause all reminders during Eid or religious events
- Social sensitivity:
 - App disguise option (rename to “Health Tracker” in browser tab and PWA)
 - Quick hide: Ctrl+H or Escape blurs screen
 - Private browsing mode detection (warn about data persistence)

Doctor Directory Data

Pre-loaded JSON with Bangladesh hospitals:

```
[
  {
    "name": "Square Hospital",
    "city": "Dhaka",
    "address": "18/F, Bir Uttam Qazi Nuruzzaman Sarak, West Panthapath",
    "phone": "+880-2-8144466",
    "specialties": ["Gynecology", "Fertility", "Endocrinology"],
    "hours": "24/7"
  }
]
```

PRESENTATION SLIDE REQUIREMENTS

When creating presentation slides about this website:

1. Use ONLY the colors from this design system
2. Use Inter font for all text

3. Use the exact page mockups/screenshots
4. Show responsive breakpoints (mobile/tablet/desktop side by side)
5. Include dark mode screenshots for technical slides
6. Include light mode for marketing/user-facing slides
7. Show app + web side-by-side to prove design consistency
8. Use outlined icons only (48px for feature illustrations)
9. Maintain 10px card radius, 8px button radius throughout
10. Include the PWA install prompt and offline indicator in screenshots
